

My Secret Outsourcing Recipe

What is outsourcing?

Outsourcing simply means hire someone to do your job.

Why outsourcing?

Simply use your time on some productive things and hire someone to do the job you are not expert at or you don't like to do.

Either you are an ordinary man or an internet guru, if you are not outsourcing your business, it simply means, you are losing hundreds or thousands of dollars every month because you are wasting your time in doing things which are less important and other experts can do at a very reasonable rate.

Just because, you know everything does not mean you have to do each and everything on your own. In every business, there are things which if get proper attention can double or triple your business & there are things which if neglected will not make that much impact.

So just hire someone to do less important things or the things you are not expert at.

Here are few examples –

1. **Mr. John** is specialist in keyword research & analysis. He can dig the keywords which can produce the gold mines but writing contents & link building takes most of his time and Mr. John does not get more time in keyword research. If he hires someone for content writing & link building, he can devote more of his time in keyword research and make big money.
2. **Mr. Sachin** is a content writer and through his contents he can attract lots of crowd, make his content viral and convince people to visit his site again for reading his valuable contents. But he does not get much time for writing on daily basis because other stuff like keyword research, SEO are important. So

if he finds someone who can manage this work, he can produce quality contents on regular basis.

3. **Mr. Aniket** is an SEO expert and he can bring a big traffic from Google on his site through his expert SEO tricks. Aniket needs to spend lots of time for SEO but because his most of time goes in writing and other stuff, he is not able to focus more on using his SEO tricks. If he hires a good content writer, all his problems can be solved.

So, you must understand the importance of outsourcing. But the most important thing in outsourcing is finding the reliable person who can do better job at reasonable rates.

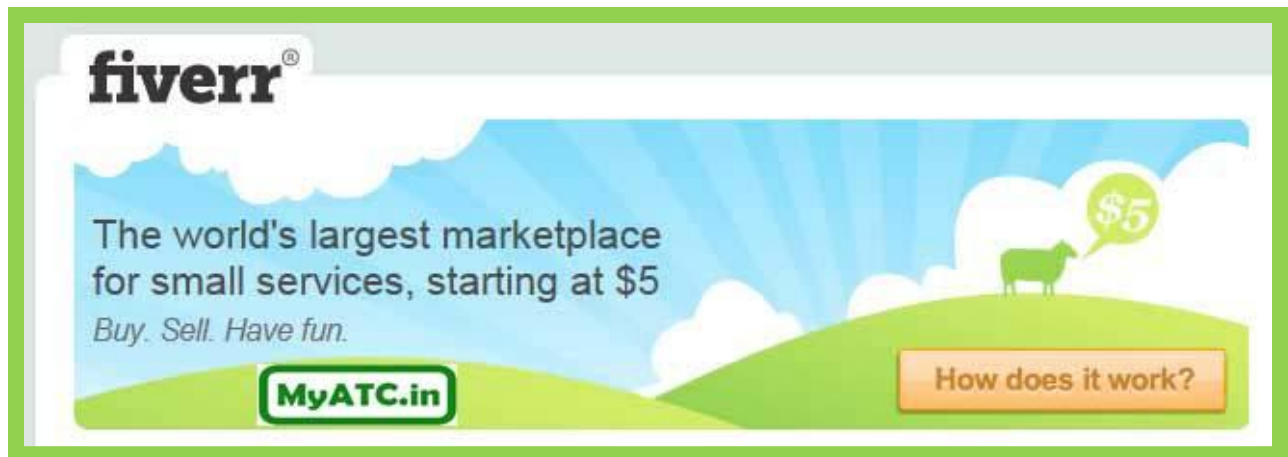

It's very tough and time consuming to find people who can do job better than you but still charges very less. And that is where my Secret Outsourcing Recipes will play an important role.

Not only, you can hire someone to do part of your jobs but this is best even if you want to outsource each and everything. Believe me, **you can outsource each and every part of creating AdSense sites.**

Where to outsource –

Although I am doing internet marketing from the last 6 years and I was outsourcing some of my work to the online companies after reading the review given by their affiliates. Many of the time, I received low quality work from such companies even after paying hundreds of dollars.

Just 2 years back, when I was reading an excellent article '[What Would You Do For \\$5?](#)' on world's largest blog TechCrunch, I came to know about a great-great site **Fiverr**.

In the last 2 years, Fiverr has gained a big popularity because of its noble idea of doing anything for \$5. People are ready to do the task they are expert at for just \$5.

Fiverr refers all the tasks as **Gigs**. You can find gigs of all types like singing a happy birthday song for you, or teaching you a cooking recipe, reading tarot cards or anything. Just visit [Fiverr.com](https://www.fiverr.com) and have a glance.

With the popularity, you will find lots of competition on Fiverr. Searching for the best person has become very difficult on Fiverr. Even the biggest challenge is what actually you want from someone.

*******In the last 2 years, I have spent countless hours, done so much research and ordered hundreds of gigs on Fiverr. The output of this study was searching for the best brains on Fiverr*******

Fiverr's rating system plays a very important role here. People who got 99% or 100% rating never spoil their rating and to maintain their rating, they always **over deliver**. Your ONE single negative comment can destroy their reputation!!

Meet the Super Stars of Fiverr

Even thousands of people knew about Fiverr but even 1% people do not have proper idea of using Fiverr effectively. If used properly, Fiverr can do some magic to your online campaigns. You can outsource each and everything to the best person on Fiverr. But here you decide which part you want to outsource. Here is the list of all the Great gigs in the same order as you will create your AdSense site.

Keyword Research

This is the most important part in creating AdSense sites. Although, you will find number of Fiverr sellers who can perform this job very well but if you do the keyword research on your own, it will be much better. Spend time with this part because, if done correctly, it can make other things easier for you.

If you are living in India, this is the biggest advantage for you and Google India will prefer your website to rank than people living in other countries provided your keyword research is perfect.

Best keywords research involve long tail keywords (keywords with 3 to 5 words) + Higher search volume + low competition + exact domain name availability (.com, .net, .org, .in or .co.in only).

If you want to research for US or UK keywords & you don't have idea on this then you can definitely try some of the Fiverr gigs. Just check some of the similar Fiverr listing-

It's really a great option if you are looking to setup your WordPress blog. Just install WordPress and give this guy your username and password and he will do following things –

- ✓ Setup the site with **clickbump WordPress theme** and arrange its look
- ✓ configure the SEO plugins like SEO pressor, SEO power, Google xml sitemap, AdSense target and all in one SEO
- ✓ Provide AdSense publisher ID & he will setup AdSense ads.
- ✓ Create About Us, Privacy policy & terms of service pages.
- ✓ Even add 1 article.

Great value for money gigs. Just in \$5, he will deliver so much. He received 100% positive rating.

Other gigs you may like in this category –

Elance & ODesk

Elance & ODesk are the world's leading platform for online employment, helping businesses hire and manage in the cloud. Elance & ODesk offers instant access to qualified professionals who work online. Elance & ODesk provides the tools to hire, view work as it progresses and pay for results.

It is faster and more cost-effective than job boards, staffing firms and traditional outsourcing, making it ideal for businesses looking to jump-start a project, broaden their reach or just simply get things done.

You can find thousands of freelance writers on these websites at very reasonable rates. You will find the writers who can work for fixed price as well as hourly basis but in my experience fixed price writers are cheaper.

If you want to use Elance or ODesk to find content writers to write your articles then first thing is join the Elance & ODesk.

To Join ODesk – [Click Here](#)

Here is the step by step tutorial on how to post an article writing job on Elance. Same procedure is for ODesk.

Just login to your Elance account -> then click '**Hire**' -> then click '**Post a Job**'. Then you will find the screen like this –

Just follow the screenshots for easy understanding for getting effective and cheap work from Elance.

The screenshot shows the Elance 'Create your job' form. At the top, there are three steps: '1. Create your job' (highlighted), '2. Select posting type', and '3. Preview'. A green stamp 'MyATC.in' is visible. The main heading is 'Create your job'. Below it, a text box says 'Describe the job or list the skills you're looking for.' with a red arrow pointing to it from the annotation 'I describe word counts, no of articles & price in the title itself'. The 'Name your job' section has a text box containing '5x500 words articles on Samsung Galaxy S2 for \$20'. The 'Describe it' section contains a text area with the following text: 'I am looking for an article writer who is passionate about writing on mobiles. I need 5 articles on "Samsung Galaxy S2" on the given keywords. These keywords will be the title of my article. Maintain at least 1% keyword density with exact keyword. Use LSI (Latent Semantic Indexing) keywords as well.' Red arrows point from the annotation 'Description to give more idea what you need.' to this text. Below this is a list of keywords: 'List of keywords - Samsung Galaxy S2 - (800 words)', 'Samsung Galaxy S2 Review - (400 words)', 'Samsung Galaxy S2 Price - (400 words)', 'Samsung Galaxy S2 specification - (400 words)', and 'Samsung Galaxy S2 mini - (400 words)'. These things decide whether he is an effective writer or not.

This way, you can outsource your article job to Elance or ODesk. I have taken the example of \$5 x 500 words because one of the articles was 800 words long. I fixed the price \$20 but you can find someone for even less than \$20 for 5 articles.

Off Page SEO or Link Building

This is the part which is most important in ranking your blog in Google & this is **what Fiverr is most famous for**. Link building is the time consuming task & if you think of doing SEO on your own for all your blogs than it's a bit difficult and you need to devote more time for this.

Fiverr is better than any local or online SEO company because they charge hundreds of dollars a month for one site and give little or no result.

But if you know the tricks of using Fiverr, you can hire people in just peanuts to meet your SEO demand. Fiverr is the best place for link building and you can very well use for all your AdSense sites. But yes, if you are targeting highly competitive keywords then Fiverr is not sufficient.

As we are working on low competition keywords with exact match domain (EMD) then Fiverr is very much sufficient. And yes, good on-page SEO is must.

So be ready with this link building strategy with the highest rated Fiverr-

1. Press Release at 5th day
2. Social Bookmarking at 10th day
3. Article Blast at 15th day
4. .Gov & .EDU Links at 20th day
5. High PR Links at 25th day

So what does this represent something in certain day? The day simply means, you have to use a particular service at this interval after publishing your first post on your blog.

It means that if you publish your first post on your new blog on 1st April, you have to order 'Press Release' Fiverr on 5th April and then social bookmarking on 10th April and so on.

So, just check out some of the Fiverr champs with these qualities.

As we know sending thousands of links to a new site can be harmful if done in correctly, this is were my service comes in. If we use article sites with your link in and then blast them with 1000s of live blog links it gives the same link juice but in a much safer away, infact its a much better way of gaining backlinks as the backlinks you recieve will be relevant to your niche which again will help improve your serps rankings.

I will provide your website with 50 backlinks from edu and gov websites. Unfortunately, I am unable to guarantee that all links will be dofollow, but even nofollow links from high authority websites can make a difference. I will create a detailed report after completion of the task. If you have any questions, please hit me up prior to ordering. *Longer turnaround time is due to the manual work involved in order to achieve higher quality.

High PR Links

High PR (Pagerank) links is something Google loves a lot. Pagerank is the ranking factor determined by Google and if you can manage to get the links from sites with domain page rank 8 or 9 then it's really great. Pagerank 8 or 9 is something very high authority in the eyes of Google and getting such links is very tough. Here are some excellent Fiverr that provide such links-

Seller – **tuhin2u**

URL - <http://fiverr.com/tuhin2u/bring-you-on-google-1st-page-by-building-a-dofollow-link-wheel-on-pr8-to-pr6-web2-sites-and-doing-75-dofollow-bookmarking-and-pinging>

Description – he will build MANUALLY a Dofollow Link Wheel on 20 Pr8 to Pr5 Web2 Sites + 20 Social Bookmarking on PR8 to PR5 Sites + Pinging and Complete Report for \$5

So these are some of the great Fiverr sellers with their Gigs. These are very trusted one because lots of people have worked with them, find very high quality work and then given so many positive reviews with their comments.

You will come across many such gigs when you will start working on Fiverr. You can make a complete plan on a spreadsheet where you can mention your tasks like –

- Which gigs you are going to use next and for which website
- Any preparation needed from your side
- Different reports you received from Fiverr sellers for your backlinks or other tasks
- When you should repeat all the gigs

Just make a **habit of investing part of your AdSense earnings** in developing your websites so the rankings for your blogs will be maintained & you get steady flow of traffic.

Indexing your Links

When you will start using Fiverr, you will receive your job reports from Fiverr sellers & you will see hundreds of backlinks coming to your sites. Google start indexing many of the links but it's not necessary, it will index all the links.

In fact, more than 50% of these links will not be indexed i.e. it will not be seen by Google to give you full advantage of these backlinks.

So just take the URL's and run them through <http://linklicious.me>. You can use the free versions of these sites. However, if you plan on building many sites you should buy a subscription to <http://linklicious.me>. Linklicious is one of the best tool for indexing all of your link.

Conclusion

How's that for a short Blueprint? Of course, I left out a lot of fluff and extra training like installation of WordPress and other standard, technical configurations. However, if you have questions on those types of items you can always search YouTube for How-To Videos OR contact us for our support.

The main point I want to drive home with this blueprint is that if you follow the EXACT steps...you will generate traffic and revenue. This is the same EXACT method I use to run my Niche Marketing business.

Once you start generating revenue, reinvest and continue to scale. Remember it's a numbers game. So, speed and consistency are the keys to success.

Also know that my team and I are continually innovating and evolving with AdSense marketing and I'll continue to share my updated methods and tools with those willing to learn.

So, go get started and make some money and please do me a favor and keep us posted on your success. I would love to showcase those who implement this method and cash in with it.

Thanks and I look forward to hearing about your success!
